Volume 16, no. 12, p. 6831: The nucleotide numbering in Fig. 1 was inadvertently erroneous. A mistake during the computer-assisted assembling of the contigs introduced an artificial internal duplication of 413 bp, downstream of the interleukin-2-responsive enhancer (IL-2rE) within a repetitive portion of the sequence. The corrected Fig. 1 is shown below. The corresponding entry Z70243 in the EMBL Nucleotide Sequence Database has been corrected accordingly. We apologize for any confusion that this may have caused.
