

# CLIMATE SEMINAR SERIES FOR STEMM\* SCIENTISTS

February 18, 2019 at 12h15-13h15, Room H4-02-A

YES  
WE  
CAN

## DEFOSSILISING SWITZERLAND? YES, WE CAN.

**Prof. François Maréchal**

**Industrial Process and Energy Systems Engineering, Ecole  
Polytechnique Fédérale de Lausanne, EPFL**

*Prof. Francois Marechal leads a research group in the field of process and energy systems engineering. His activities concern the development of computer aided methods for the design of integrated energy systems with applications in rational use of energy and resources in industrial processes, long term energy storage, conversion of biomass for bio-products and biofuels in biorefinery concepts, urban energy systems and energy systems at the country levels*

\* SCIENCE, TECHNOLOGY, ENGINEERING, MATHEMATICS & MEDICINE
