The authors wish to make a correction to the published version of their paper [1] because they misread a finding that they cited from the article by Chibani et al. [2] (This reference is cited as [9] in the original text.).

In the second paragraph of Section 4.2, the sentence “This alteration was not reported in the 1000 Genome Project or in the ExAC database and was only recently reported in compound heterozygous state [9].” should be changed to “This alteration was not reported in the 1000 Genome Project or in the ExAC database but has recently been found [9].”

The authors would like to apologize for any inconvenience caused. The change does not affect the scientific results. The manuscript will be updated and the original will remain online on the article webpage, with a reference to this correction.

**Conflicts of Interest:** The authors declare no conflict of interest.
