Erratum to: Eur. Phys. J. C 79 (2019):706
<https://doi.org/10.1140/epjc/s10052-019-7159-8>

In the Introduction section of the original article [1], the parameter λ was defined erroneously. The correct definition is $\lambda \equiv (q/p) (\bar{A}/A)$.

In Table 4, the systematic uncertainties due to the mass-width parametrisation, the mass dependence on the decay time and angles and the multiple candidates were erroneously documented. The corrected table (Table 1) is shown below.

As a result, the total systematic uncertainty on the parameter δ_{\parallel} changes from 0.037 rad to 0.036 rad, and on the parameter $|A_0|^2$ from 0.0024 to 0.0023, both in Table 4 and in Eq. (15) of the original paper. The remaining systematic uncertainties are unchanged. The corrected Eq. (15) is

$$\begin{aligned}\phi_s &= -0.083 \pm 0.041 \pm 0.006 \text{ rad} \\ |\lambda| &= 1.012 \pm 0.016 \pm 0.006 \\ \Gamma_s - \Gamma_d &= -0.0041 \pm 0.0024 \pm 0.0015 \text{ ps}^{-1} \\ \Delta\Gamma_s &= 0.077 \pm 0.008 \pm 0.003 \text{ ps}^{-1} \\ \Delta m_s &= 17.703 \pm 0.059 \pm 0.018 \text{ ps}^{-1} \\ |A_{\perp}|^2 &= 0.2456 \pm 0.0040 \pm 0.0019 \\ |A_0|^2 &= 0.5186 \pm 0.0029 \pm 0.0023 \\ \delta_{\perp} - \delta_0 &= 2.64 \pm 0.13 \pm 0.10 \text{ rad} \\ \delta_{\parallel} - \delta_0 &= 3.06^{+0.08}_{-0.07} \pm 0.04 \text{ rad.}\end{aligned}\quad (15)$$

These changes have a small impact on the average of Run 1 and Run 2 $B_s^0 \rightarrow J/\psi K^+ K^-$ results presented in Eq. (16) in the original article, which changes to

$$\begin{aligned}\phi_s &= -0.081 \pm 0.032 \text{ rad} \\ |\lambda| &= 0.994 \pm 0.013 \\ \Gamma_s &= 0.6572 \pm 0.0023 \text{ ps}^{-1} \\ \Delta\Gamma_s &= 0.0777 \pm 0.0062 \text{ ps}^{-1} \\ \Delta m_s &= 17.694 \pm 0.042 \text{ ps}^{-1} \\ |A_{\perp}|^2 &= 0.2489 \pm 0.0035 \\ |A_0|^2 &= 0.5195 \pm 0.0034 \\ \delta_{\perp} - \delta_0 &= 2.87 \pm 0.11 \text{ rad} \\ \delta_{\parallel} - \delta_0 &= 3.153 \pm 0.079 \text{ rad.}\end{aligned}\quad (16)$$

The resulting correlation matrix is shown in Table 2, which replaces Table 6 of the original article.

The average of all LHCb measurements presented in Eq. (17) in the original article changes to

$$\begin{aligned}\phi_s &= -0.042 \pm 0.025 \text{ rad} \\ |\lambda| &= 0.993 \pm 0.010 \\ \Gamma_s &= 0.6563 \pm 0.0021 \text{ ps}^{-1} \\ \Delta\Gamma_s &= 0.0813 \pm 0.0048 \text{ ps}^{-1}.\end{aligned}\quad (17)$$

The resulting correlation matrix is shown in Table 3, which replaces Table 7 of the original article.

The changes in the combined results are small, the largest being $\Delta\Gamma_s$ in the $B_s^0 \rightarrow J/\psi K^+ K^-$ combination. It is at the level of 11% of the total uncertainty. These changes do not affect the conclusions of the paper.

Furthermore, Fig. 12 in the original article, presenting the combined LHCb results, is amended to reflect the changes and the correct version (Fig. 1) is shown below.

The original article can be found online at <https://doi.org/10.1140/epjc/s10052-019-7159-8>.

Fig. 1 Regions of 68% confidence level in the $\phi_s - \Delta\Gamma_s$ plane for the individual LHCb measurements and a combined contour (in blue). The $B_s^0 \rightarrow J/\psi K^+ K^-$ (magenta) and $B_s^0 \rightarrow J/\psi \pi^+ \pi^-$ [2] (red) contours show the Run 1 and Run 2 combined numbers. The ϕ_s [3] and $\Delta\Gamma_s$ [4] predictions are indicated by the thin black rectangle
